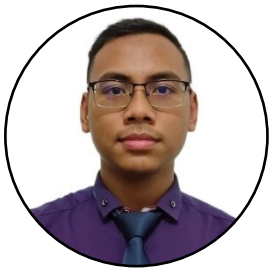
MUHAMMAD AZLY RUZAINI ANUAR



Bachelor of Computer Science (Maritime Informatics)
System Development • Process Automation • IT Operations Support

+6013 263 7289 • azlyruzainianuar@gmail.com • Rawang, Selangor

SUMMARY

Recent graduate in Computer Science with hands-on experience in IT system development, IT operations support and process automation within manufacturing and public sector environments. Demonstrates strong capability in developing low-code business applications, troubleshooting technical issues and supporting system implementation across cross-functional teams. Proven track record of delivering 4 internal automation systems and reducing operational processing time by up to 30%, significantly improving workflow efficiency. Experienced in IT project coordination, system analysis and technical documentation aligned with business and operational requirements. Adept at translating user needs into functional IT solutions while ensuring system reliability and performance. Positioned to contribute as an IT Executive / Technical Assistant by strengthening IT operations, supporting system enhancements and driving continuous process improvements.

CORE EXPERTISE

- IT Project Coordination & Implementation
- System Development & Enhancement
- Business Process Automation
- IT Operations & Technical Support
- System Troubleshooting
- Issue Resolution
- System Analysis & Fit-Gap Assessment
- Stakeholder Coordination & Requirement Gathering
- Documentation & Technical Reporting
- Process Improvement & Optimization

NOTABLE ACHIEVEMENTS

- Developed 4 internal business applications using Microsoft Power Platform, improving workflow efficiency and supporting daily operations for a 100+ member production team
- Reduced document retrieval time from 5 minutes to 10 seconds by implementing a barcode scanning solution, significantly enhancing packing process efficiency and operational speed
- Delivered a parcel management system that improved processing efficiency by 30%, streamlining operations and reducing manual workload within university logistics system

PROFESSIONAL EXPERIENCE

Practical Trainee (IT / System Development) Aug 2025 – Jan 2026
Perodua Manufacturing Sdn Bhd

- **System Development:** Designed and deployed 4 Power Apps-based internal systems, improving workflow efficiency and reducing manual processes across a 100+ member production team
- **Process Automation:** Implemented barcode scanning functionality in A-SPIS, reducing document retrieval time from 5 minutes to 10 seconds, significantly improving packing productivity
- **System Integration:** Integrated 100+ standard documents across 8 vehicle models, enhancing data accessibility and strengthening document control processes
- **IT Project Coordination:** Coordinated with users and internal stakeholders to gather requirements and ensure successful implementation of IT solutions aligned with operational needs and system usability improvements
- **System Analysis:** Conducted system evaluation and supported fit-gap analysis, ensuring solutions effectively addressed process inefficiencies and improved system usability

IT Support Trainee Aug 2021 – Feb 2022
Pejabat Tanah Kuala Krai

- **Technical Support:** Provided hardware and software support for 50+ users, ensuring system reliability and minimizing operational disruptions across daily office functions
- **Network Monitoring:** Monitored and troubleshooted network connectivity issues, maintaining stable system performance and reducing downtime for critical operations
- **Issue Resolution:** Diagnosed and resolved technical issues efficiently, improving user productivity and reducing recurring system-related problems
- **Documentation Management:** Compiled technical reports and system documentation, supporting data-driven decision-making and continuous improvement of IT processes

MUHAMMAD AZLY RUZAINI ANUAR

PROJECT EXPERIENCE

- **Autoview Service Parts Inspection Standard | Developer**: Developed barcode-based inspection system replacing manual checks, reducing document lookup time from minutes to seconds and improving packing efficiency
- **Autoview Service Parts Document Standard | Developer**: Built centralized system managing 100+ documents across 8 vehicle models, improving accessibility, standardization and control
- **Kemuning Room Booking System | Developer**: Implemented automated booking and approval workflow, reducing manual coordination and improving scheduling efficiency across departments
- **Pallet Maintenance Management System | Developer:** Designed digital tracking system, improving maintenance visibility and enabling faster response to pallet damage issues
- **Post Siswa UMT Parcel System | Developer**: Developed full-stack system, reducing parcel processing time by 30% and improving overall operational workflow efficiency

EDUCATION

Bachelor of Computer Science (Maritime Informatics) 2026
Universiti Malaysia Terengganu
Core Subjects: Database Systems, Software Engineering, System Analysis & Design, Web Development, Computer Networking

Diploma in Information Technology (Digital Technology) 2022
Politeknik Ungku Omar

TRAINING

Technical Certifications:

- Microsoft Power BI Essentials | NextStep Academy
- Excel 101 Mastery | NextStep Academy

Industry-Specific Certifications:

- Professional Certificate in IT | KYDP (Khazanah Nasional)
- BeDigital Bootcamp Miniseries | PETRONAS

EXTRACURRICULAR ACTIVITIES & LEADERSHIP

- **Leadership Management:** Led Persatuan Seni Silat Cekak Malaysia UMT as President, managing activities for 100+ members and improving overall organizational engagement and participation
- **Membership Growth:** Increased active membership by 40% through structured recruitment strategies and engagement initiatives across multiple faculties
- **Event Coordination:** Coordinated national-level competitions, strengthening team performance and enhancing university representation at competitive events
- **Training & Development:** Organized safety and awareness programs as SISPA Cadet Officer, improving safety knowledge by 25% among participants
- **Crisis Response:** Contributed to emergency response missions, delivering aid and training to 300+ individuals while demonstrating leadership under high-pressure situations

SOFTWARE SKILLS

MS Office Suite:	Word, PowerPoint, Excel
Programming & Development:	Java, C++, C#, SQL
Low-Code & Business Systems:	Microsoft Power Apps, Power Automate, SharePoint
Web Technologies:	HTML, CSS, JavaScript
